6.15

Rotate right 90°

1) Left 90°

2) 180°

Flip Vertical

Horizontal

These are used to do images according to you.

Pencil tool: Now select pencil & write in the paint file like your name.

You can increase size of pencil also

Second option is Fill in Color. Like ~~you~~ if you selected black then Black color is filled in the file. ~~you~~

Make black to every ~~of file~~ point which is in white colour.

You can change the color. like yellow, green, orange.

Next is Text

if you want to write text then select it & write some text

Make color change such that color can be appeared

Once you remove selection then it will become finalized.

You can select font from upside & can change the font & can change font size

You can select Italic, underline & strike also

You can set Opaque & Transparent to the text.  
You can change the colors also from color palette.  
From edit colors you can select tot any color from this. You can set Hue, Sat & lum  
You can set Red, Green, Blue content (it is content) it will display according to that.

In Opaque you can change background.

Next is Eraser: By Eraser you can delete the content

To increase size of eraser by clicking  $Ctrl + +$

& to decrease size of eraser by clicking  $Ctrl + -$

Next is Magnifier: you can Magnify a particular

→ Color picker: This is used to pick the color.

You can magnify a particular position

Next is Brusher: Different type of brushes are there & select the size & see the differences in different brushes

Air brush is there

oil brush.

Crayons

Markers

Natural pencil

Water Color Brush

These many brushes are there.

Day 3

(51)

6.4

New

fill color

Now shapes .

Now insert all the shapes in file. with square.

First is line simple.

Second is line you can divert this line.

Third is Circle

Square Rectangle

Round Rectangle

Free hand

Triangle

Like in box you want to fill color then go to fill then go to Solid Color. white color will be filled.

Background color could be changed.

Then go to fill

Solid Color

Oil

Crayon color

Natural Pencil.

Markers

Water color.

All the shapes can put.

Once finalize then you will not be able to change things in sheet.

Edit with paint 3d you can do also there is different

Markers are there & tools are also different there

like Thickness, opacity, Markers are there.

Hexadecimal contains 3 colors

First 2 is Red, Second is Green & Third 2 is Blue color

You can change image format also like

png to jpg

jpg to gif

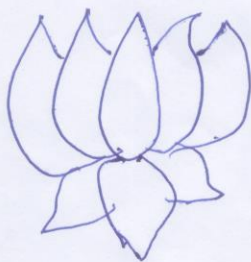

When click on edit image will appear in Paint.

Create two photos
